bin	7/23/2019 4:42 PM	File folder	
license	7/23/2019 4:42 PM	File folder	
supportfiles	7/23/2019 4:42 PM	File folder	
nidist.id	7/23/2019 4:42 PM	ID File	1 KB
setup.exe	6/2/2016 12:38 PM	Application	1,430 KB
setup.ini	7/23/2019 4:42 PM	Configuration sett...	16 KB

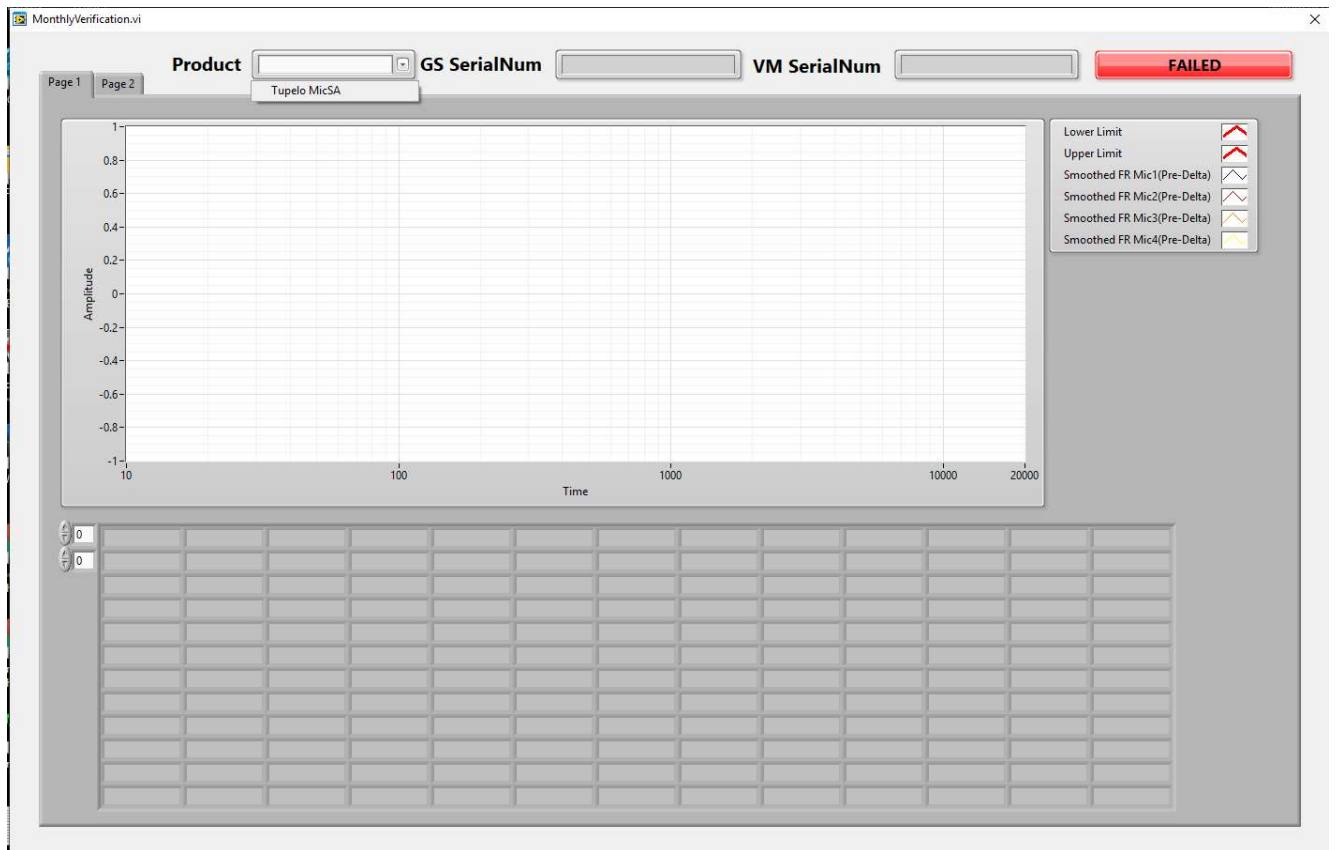

## How to use the tools?

- Application will add into start menu once installed.

- Once app launch, select the product to start generate the report. Once product select, it will ask to select the Directory for Log file. Current version only support MicSA log in Json format. The drop down list will show all product that with template installed. The new product name will be add automatically once you add in new database for template in future.

- Please make sure only json file are exist in the directory. The app will auto detect the type of log file to extract the data. Press "Select Folder" to continue. The PDF report will be generate in "data folder\report"
